Registered in England No 3127574

## berkeley Integra Ltd - Our Company Overview

### Who are we?

berkeley integra Limited was founded in 2005 as a specialist installer of proprietary & glazed partitioning. In recent years and with the advent of experienced staff, we have diversified and expanded into the dry lining, suspended ceilings (K10 and K40) and associated works for the commercial environment. With an office in Crawley the company concentrates as exclusively as possible on the installation of proprietary & glazed partitioning systems along with their associated works, undertaking contracts throughout Southern England, Great London, M4 corridor, Wales and the Midlands.

The directors have extensive experience of the fit-out industry with Moi Bliss as MD being responsible for the growth and organisation of the company whilst Commercial and Contracts Directors, Charlie Young and Dougie McDowell respectively, provide experienced management for all projects, ranging in value from £1,000 to £1,500,000 and from tender stage through to delivery and post installation support.

### What do we do?

We do not compromise our position with design but install products provided by the major & established manufacturers. These include but are not limited to, Ocula, CCF, MHR Design (Logika) and Lizzanno, Komfort, Saint Gobain and British Gypsum.

However by not subscribing to 'restrictive' dealerships we do have opportunity to comment on the most suitable product for any given project and are able to offer comparative costs for any alternatives considered compliant by those responsible for its design. berkeley integra Ltd does not have P.I. and therefore has **no design responsibility what so ever.**

The depth of the company's experience, technical knowledge and flexible approach has allowed us to expand our scope of works to undertake projects that vary in size and complexity and meeting the wishes of clients to 'package' works which will typically include;

- K30 Proprietary system partitions.
- K10 Drywall partitions, linings and plasterboard ceilings.
- L10 Glass partitions.
- K40 Demountable suspended ceilings.
- L20 Doors.
- P21 Ironmongery.

## Who do we work for?

We have been involved on construction contracts across a wide range of business sectors including commercial businesses, education, leisure, industrial, research & development plus Public & Government departments.

Working alongside the industry's professional organisations, from principal main and fit out contractors to architectural and bespoke designers and often being part of their preferred supply chain, Berkeley Integra has developed a work ethic that provides the very best in client relationships and service and concentrates on its reputation for quality workmanship.

The company has developed the structure and financial resources to fulfil its contractual obligations required and have an established portfolio of clients with whom we are proud of our levels of repeat business.

## Accreditations

The company is registered and compliant to the relevant industry standards including ISO 9001, CHAS, Construction Line, CITB, and membership of FIS. We encourage training protocols for our site staff which is independently monitored by our Safety Services advisor. All will hold trade CSCS skills cards and are commonly trained in PASMA, working at heights, first aid, asbestos awareness, and when appropriate our supervisors and managers will be trained to SSSTS or SMSTS standard.

## News

We have gained more experience in the D&B world and have recruited the appropriate staff to enable us to continue to improve and develop our service. Although design is not one of our accomplishments or a service we offer. Our strength lies in being able to work competently within this section of our industry.
